Data Notes and Limitations

Coverage	3,044 deals from 2015 to 2020. 2020 contains January only, so its decline is not a real trend.
Missing Amounts	31.9% of deals have no disclosed amount (2,073 of 3,044 have one). Total funding is therefore understated, and medians use only deals with an amount.
Corrections	11 deals reported in rupees were recorded as USD. They were corrected (about $5.46B reduced to about $0.08B).
Standardization	Startup names were standardised (2,457 to 2,244), for example Ola Cabs to Ola. Gurugram, New Delhi and Noida are grouped as Delhi NCR. Unique investors are counted case-insensitively.
Exclusions	True North ($600M) is excluded from startup rankings because it is an investment firm, not a startup. City views exclude unclear locations.
Industry Data	Industry views include only industries with at least 10 deals with a disclosed amount (1,990 of 3,044 deals, about $21.1B of $32.8B). Industry data is largely unavailable for 2015. Some labels overlap (for example Finance and FinTech) and were not merged.
